

# Commonly-Used Symbols

## ©2011 Technical Word of the Week Newsletter

6 September 2011

Those working in a technical environment often come across the use of symbols. Here is a selection of some that are commonly used. Match the meaning to the symbol by using the following:

*factorial, equals / is, is less than or equal to, product, is not equal to, sum, cubed, integral, is less than, square root of, therefore, squared, and so on, is proportional to, infinity, three-eighths, times / multiplied by, difference, is greater than, divided by*
