

Crisis management

Using Army of the Czech Republic in non-military crisis situation at the Czech territory

Framework for using of Armed forces

SECURITY AND DEFENCE CONCEPTION

Tasks of Armed forces are determined by laws and international obligations

Act No 222/1999 Coll., on Securing defence of the Czech Republic

Adjusts the basic legal relationships with national defense:

it sets out the basic obligations of individual entities in ensuring of defence against external attack and responsibility for breach of these obligations.

For preparation and ensuring of national defence is responsible the Government.

According to § 14 is possible to use Czech's Army

Forces in the following cases:

- to guarding of facilities vital for state defence,
- for the tasks of Czech Police during the discovery State Border Protection,
- rescue operations in case of disasters or other serious situations endangering lives, health, considerable property values or environment (e.g. natural disasters, environmental disasters, etc.),

According to § 14 is possible to use Czech's Army

Forces in the following cases:

- to provide air transport of constitutional officials
- to provide air search and rescue service,
- providing humanitarian tasks,

Using of Czech Armed Forces in crisis management is also based on following laws:

- - Act No. 239/2000 Coll., on Integrated Rescue System.
- - Act No. 240/2000 Coll., on Crisis management.

DOCTRINE

OF THE ARMED FORCES
OF THE CZECH REPUBLIC

MILITARY OPERATIONS

Doctrine of the Armed Forces of the Czech Republic

USING CZECH ARMY

In the Czech Republic

**In the Czech Republic
with assistance of Allied Forces**

**Crisis situation non-
military character in the
territory of the Czech
Republic**

**Outside of the Czech
Republic**

**Operation of
NATO, EU, OSN,**

a) Operations within an integrated rescue system of the Czech Republic (IRS).

- rescue operations in cases of disasters or other serious situations, endangering lives, health, considerable property values or environment, if the administrative authorities, territorial autonomy authorities and basic IRS components can't ensure rescue operations within their power;
- to remove other impending threats using military equipment, if the administrative authorities, territorial autonomy authorities, legal entities and IRS don't possess the required equipment;
- air monitoring of disaster or radiation and chemical situation in a given territory;

a) Operations within an integrated rescue system of the Czech Republic

- providing transport of humanitarian and medical help;
- to provide air medical evacuation, when there is a danger of delay and the forces and means of the air rescue service are not sufficient;
- to provide air search and rescue service.

b) Assistance operations to support the police of the Czech Republic

 To protect national borders,

 To carry out the tasks of public order police or protective services if the forces and resources of the Police will not be sufficient to ensure internal order and security.

b) Assistance operations to support the police of the Czech Republic

Forces and means of other components of the Czech's armed forces on the territory can be used for the Police of the Czech Republic tasks, if they are not involved in preparing for or executing its major tasks. Use of these forces and means will always be short-term.

The use of the Czech's armed forces in this kind of assistance operations comes from the demands of responsible central and regional crisis management authorities. To meet these demands, the Czech's armed forces create purpose-built task forces.

NÁČELNÍK GENERÁLNÍHO ŠTÁBU

Praha . září 2009

NAŘÍZENÍ

k zabezpečení veřejné části státní návštěvy Jeho Svatosti papeže Benedikta XVI. v České republice

Ve dnech 26. – 28. září 2009 se uskuteční státní návštěva Jeho Svatosti papeže Benedikta XVI. v České republice. V průběhu veřejné části návštěvy proběhnou bohoslužby dne 27. 9. 2009 v Brně a dne 28. 9. 2009 ve Staré Boleslavi. Armáda ČR je vyzvána k přijetí opatření vztahujících se zejména k posílení pořádkové služby při veřejné části státní návštěvy a pro kulturní zabezpečení. Na základě rozhodnutí ministra obrany je použití Armády ČR v souladu s ustanovením § 14 odst. 1 písm. j) a § 24a zákona č. 219/1999 Sb., o ozbrojených silách České republiky, ve znění pozdějších předpisů.

K tomu nařizuji:

OISD are divided into two basic groups depending on the guard support required from the Czech's armed forces elements.

- **MILITARY OBJECTS** - estates and facilities located within military domains and their fixtures, which are of great significance for ensuring the state defence in political, military or economic terms and buildings and landed estates, where the property rights or other rights are exercised by the Ministry of defence or by a legal entity established or founded by the MOD.
- **NON-MILITARY OBJECTS** - government designated landed estates, buildings and other objects which can have strategic importance to the country in a state of peril or in the state of war, including specified segments of state boundaries and buildings and landed estates designated for population protection.

MILITARY OBJECTS

- Guarding of military objects will be within military operations on the Czech's territory conducted by the Czech's armed forces members. Primary emphasis is on military objects used for **storing weapons, ammunition, their misusable components and restricted items**.
- In the threat of a crisis or in the crisis situation associated with the threat to the external or internal Czech's security, the intensity of standard provided guarding will increase and the amount of guarded military objects will extend.

NON-MILITARY OBJECTS

- **Non-military objects** will be secured and guarded by the Czech's armed forces only on the basis of government's decision and usually in the threat of a crisis or in the crisis situation associated with the threat to the external or internal Czech's security.
- The emphasis will be laid on guarding such objects, where the devastating potential is accumulated in such an amount that its possible release endangers the lives and health of a significant population (**nuclear power plants, reservoirs, chemical plants**).

Objects important for state defence (OISD)

Objects important for state defence

MILITARY

NON-MILITARY

chemical plants

Strategic properties and buildings appointed by government

military training facilities

airport

water plants

reservoirs

nuclear power plants

d) Air space defence of the CR

Air space defence of the Czech Republic, particularly within the NATINEADS system - **NATO Integrated Extended Air Defence System**. These operations are controlled in a NATO environment, based on multinational agreements of participating countries.

Air space defence of the Czech Republic is an application of NATO counter air defence operations in conditions of the Czech Republic and therefore the AFCR follow the same principles. It has an exclusively defensive character and aims at fighting off an attack of the Czech's territory by an opponent's air means.

This task has also a preventive function, for it demonstrates determination of the Czech Republic to adamantly act against the emergence or possibly escalation of an armed conflict.

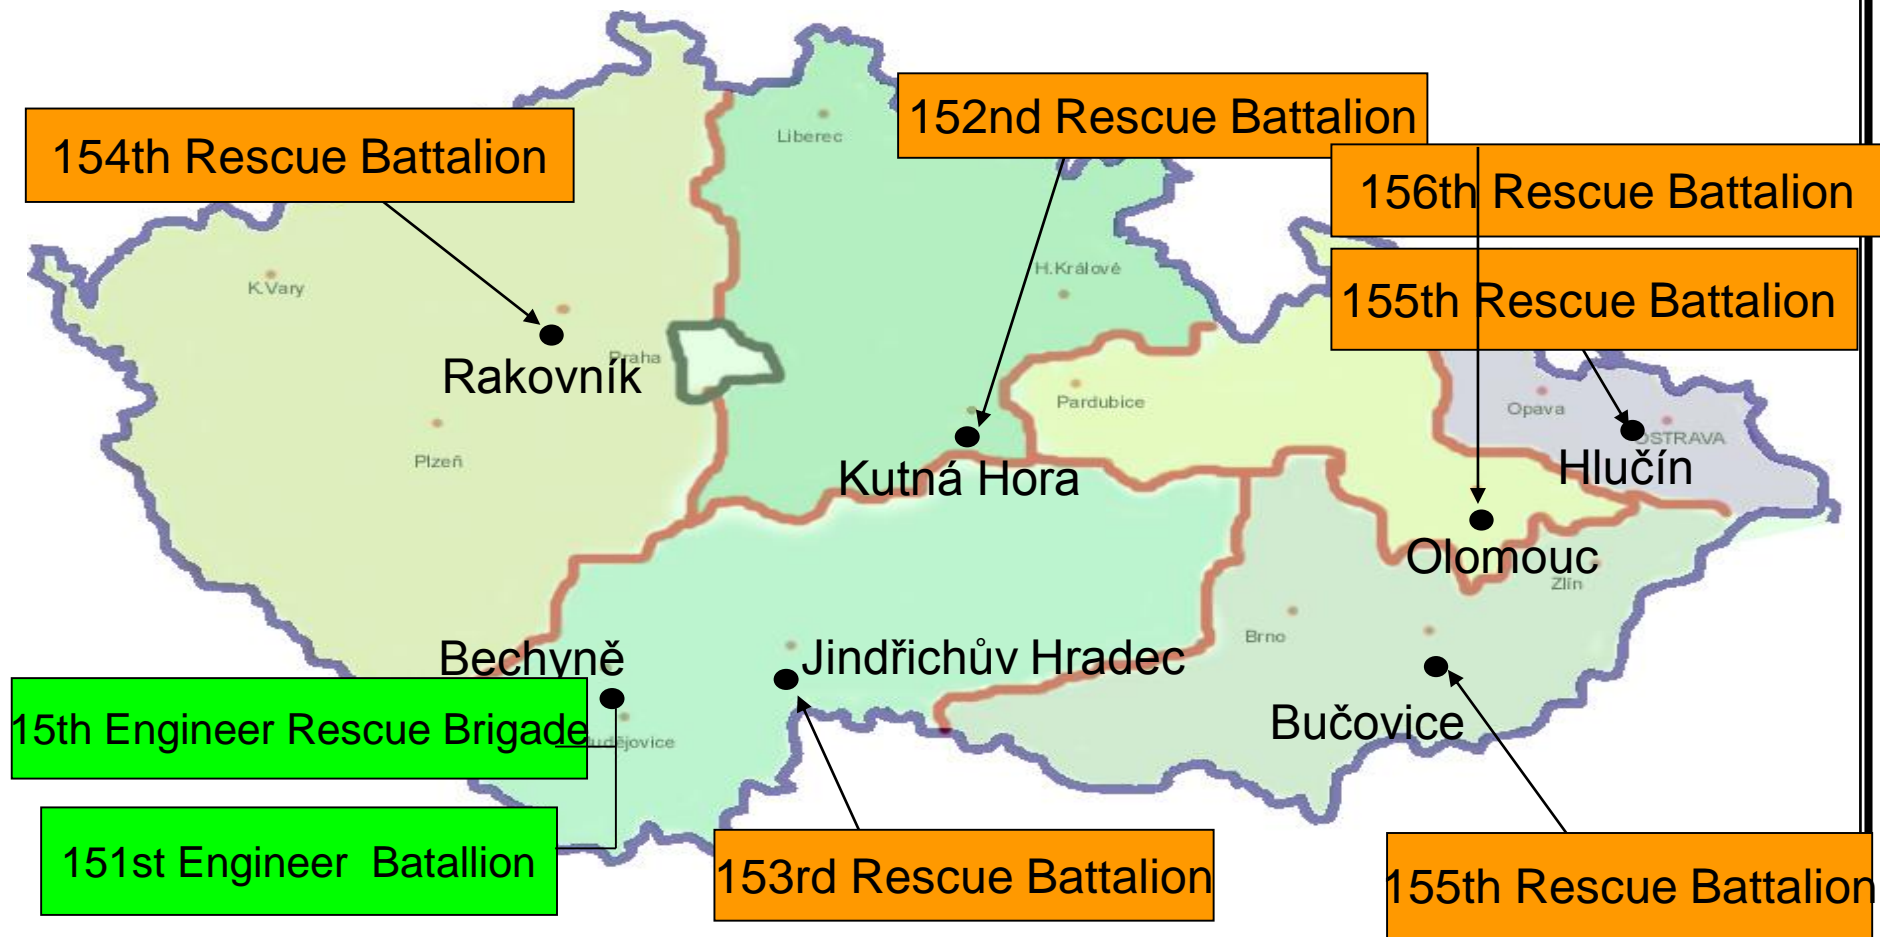

TRANSFORMATION of Ministry of Defence

TRANSFORMATION

- Competence to use of Army of the Czech Republic within the IRS and for fulfillment of tasks of Police of the Czech Republic has First Deputy Chief of the General Staff – Director of Joint Operation Centre of Ministry of Defence on delegated powers.
