

# Crisis management

## Crisis management in the area of state defence

# Content

1. Defence planning and civil emergency planning
  2. National defence planning
- Conclusion

# Defence planning

## Defence planning

- ❑ is a **summary of activities**, procedures and relationships undertaken by state authorities in order to implement the goals and national defence tasks and from those tasks resulting subjects, procedures and deadlines for their completion. It is necessary to respect political, military, economic and technological requirements and the most effective use of human, material and financial resources.
- ❑ **The goal** of NATO defence planning is to create a framework for merging defence planning and planning of individual national states in order to achieve fulfilment of NATO military requirements most efficiently. NATO countries retain their sovereignty; detachment of the military powers is on rather voluntary basis.

# Defence planning

**Defence planning** represents summary of activities, procedures and relationships realized by state authorities to determine goals, needs and **tasks of national defence**.

It must respect:

- ✓ **political and economic aspects,**
- ✓ **effective resources (personnel, material, finance).**

*State defence is a matter all state bodies, local government bodies, legal entities and citizens.*

The basic planning document for the national defence is:

**The Defence plan of the Czech Republic.**

# State Defence Planning

(Act No. 222/1999 Coll., Security defence of the Czech Republic):

- Defence planning
- Operational planning
- Mobilization planning
- Planning of the state defence system preparedness
- Planning of preparations for rescue operations and performance of humanitarian tasks

# Defence planning

- Defence planning is a set of activities, procedures and links carried out by state authorities to determine the objectives, needs and tasks of national defence and from them resulting procedures and deadlines of their accomplishment and ways of control.
- The content of course respects political, security, military, economic and technological requirements, theoretical requirements for the securing national defence, and is dictated by the effort to use human, material and financial resources in the most efficient way.
- Defensive Planning affects planning of armed forces, equipment, resources, communication and information systems and logistics planning.

# Operational planning

Operational planning is a planning process whose objective is to elaborate a military-strategic objectives into complex plans of military operations coordinated at time and space.

# Mobilization planning

Mobilization planning is a planning process whose objective is to establish a sequence, timing and ways of commitment of the mobilization of the armed forces of the Czech Republic and their human and material securing.

# Planning of the state defence system preparedness

It is a planning process for securing complex preparedness of the defence system of the state.

## Planning of preparations for rescue operations and performance of humanitarian tasks

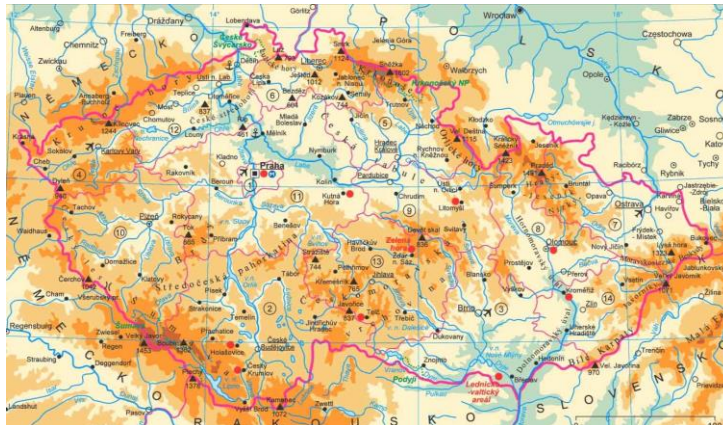

Planning of preparations for rescue work is made up of a set of elements, activities and measures of the legislative, economic and professional character. It is intended to divert or limit the immediate effects of adverse consequences of extraordinary events. It also includes a set of powerful elements for planning in other departments and areas. The terms civil emergency planning and crisis planning are used in this connection. They are linked to the Crisis Act and the Act on Integrated Rescue System.

# National Security Council

The Defence Planning Committee

Committee for Civil emergency planning

# Defense Planning Committee
