Combat and combat service support to the field artillery battery in operations

Educational objective:

To describe combat and combat service support to the field artillery units in operations.

Combat and combat service support to the field artillery battery in operations

Content

1. Combat support service of troops
2. Combat support of field artillery troops
3. Security of field artillery troops

1. Combat support service of troops

DEFINITION

Combat service support is a subset of military logistics. Combat service support is more limited in depth than logistics, as it primarily addresses those factors directly influencing combat operations.

2. Combat support of field artillery troops

DEFINITION

Combat support refers to units that provide fire support and operational assistance to combat elements. Combat support units provide specialized support functions to combat units in the areas of chemical warfare, combat engineering, intelligence, security, and communications.

2. Combat support of field artillery troops

The combat support branches are the:

- Chemical Corps
- Corps of Engineers (these are units involved with civil engineering, not combat engineering)
- Military Intelligence Corps
- Military Police Corps
- Signal Corps
- Army Aviation (e.g., Battlefield Reconnaissance, Signals Intelligence, and Assault Helicopter units)

3. Security of field artillery troops

- Warning systems
- other tactical activity
- observation posts

Combat and combat service support to the field artillery battery in operations

Tasks for individual work:

1. To describe the organization and implementation of combat support and services to the artillery units operations.
2. To handle selected combat management documents for the combat support and services to the field artillery platoon and/or battery operations.
